What is the PIT Program?
The Priority Industry Training (PIT) Program, under Future Skills WA, is government funding available for training priority industry qualifications.

What qualifications can be undertaken through the PIT Program?
There are currently 130 qualifications that are eligible for funding, ETAS Group currently delivers the following qualifications as part of the PIT program:
- Diploma of Training Design & Development
- Diploma of Management
- Advanced Diploma of Management
- Cert II in Surface Extraction

Where and When do the courses take place?

Perth Based Training: Where the program is not delivered on-the-job, ETAS Group delivers the ‘face-to-face’ component at our training rooms in Osborne Park. After each session there is some assessment work/ evidence to collect from the workplace.

Onsite at your workplace: We are able to work with your team to develop a schedule that works for you and your rosters/workplace requirements (minimum numbers apply).

What are the financial benefits?
The training costs are less as they are subsidised by the WA state government, and unlike traineeships and other funding programs there are no restrictions based on previous level of awarded qualification.

Course costs differ slightly depending on unit selection but will range between $500 - $2,500 per person/program.

There are also no restrictions on age and funding is open to participants on a number of visa classes (including 457).

How do I find out more information?
